# Bay Pediatric Vaccine Policy

Listed below is our policy on vaccinating children. We firmly believe in the effectiveness of vaccines to prevent serious illness and to save lives.

We also believe that all children and young adults should receive all of the recommended vaccines according to the schedule published by the Centers for Disease Control and the American Academy of Pediatrics.

We believe that vaccinating children and young adults may be the single most important health-promoting intervention we perform as health care providers, and that you can perform as

parents/caregivers. The recommended vaccines and their schedule given are the results of years and years of scientific study and data gathering on millions of children.

The vaccine campaign is truly a victim of its own success. It is precisely because vaccines are so effective at preventing illness that we are even discussing whether or not they should be given. Because of vaccines, many of you have never seen a child with polio, tetanus, whooping cough, bacterial meningitis, or even chickenpox, or known a friend or family member whose child died of one of these diseases. Such success can make us complacent or even lazy about vaccinating. But such an attitude, if it becomes widespread, can only lead to tragic results.

We are making you aware of these facts not to scare you but to emphasize the importance of vaccinating your child. We recognize the choice may be an emotional one for some parents. We will do everything we can to convince you that vaccinating according to the schedule is the right thing to do. However, **should you have doubts, please discuss these with your health care provider in advance of your visit.**

All patients in the practice are required to receive a minimum of DTaP, Hib, polio, and pneumococcal vaccines by three months of age, all AAP-recommended immunizations by two years of age, and meningococcal vaccine and booster doses of Tdap and varicella vaccines by age 12 years.

**Finally, if you should absolutely refuse to vaccinate your child despite all our efforts, we will ask you to find another health care provider who shares your views.** We do not keep a list of such providers, nor would we recommend any such physician. Please recognize that by not vaccinating you are putting your child at unnecessary risk for life-threatening illness and disability, and even death.

As medical professionals, we feel very strongly that vaccinating children on schedule with currently available vaccines is absolutely the right thing to do for all children and young adults. Thank you for your time in reading this policy, and please feel free to discuss any questions or concerns you may have about vaccines with any one of us.
